

Ana Gomes

Frontend Software Engineer | React, TypeScript, Next.js | Scalable Frontend Architectures & Performance Optimization

anaclimgo@gmail.com | +55 87 9 8831-0406 | [Linkedin](#) | [Github](#) | [Portfolio](#) | Pernambuco, Brazil

Summary

Frontend-focused Software Engineer with proven success in building scalable SaaS platforms and AI-powered products. Skilled in React, Next.js, TypeScript, Tailwind CSS, and cloud workflows. Achieved 90%+ reduction in API requests and cut AI infrastructure costs by up to 85%. Seeking remote roles focused on frontend engineering and modern SaaS solutions.

Experience

Software Engineer

Content Path | London, UK (remote)

09/2025 – Present

- Refactored large-scale React components (3k+ lines) using React and TypeScript, improving maintainability, frontend scalability, and developer experience across complex AI workflows.
- Designed local-first persistence and caching strategies using Supabase and custom state management, reducing unnecessary API requests by 90–95% and significantly improving application responsiveness.
- Developed real-time AI-powered interfaces and integrated backend APIs using React, Zustand, Supabase, and Node.js, enabling scalable and interactive product workflows.
- Implemented AI orchestration and optimization layers, reducing token consumption and infrastructure costs by 70–85% while improving overall system efficiency.
- Collaborated directly with founders on frontend architecture, scalability decisions, and multi-tenant system design, helping support real-time collaboration features and long-term product growth.

Front-End Engineer

Pipoca Ágil | São Paulo, Brazil (remote)

01/2025 – 09/2025

- Developed responsive web and mobile interfaces using React.js, React Native, TypeScript, and Tailwind CSS, improving UI consistency and delivering a smoother cross-platform user experience.
- Integrated RESTful APIs and collaborated with backend developers to improve data flow reliability and accelerate feature delivery within the product.
- Introduced Docker-based development workflows, eliminating environment inconsistencies and significantly improving onboarding and deployment reliability across the team.
- Mentored junior developers through pair programming, technical guidance, and GitHub code reviews, helping improve development quality and team collaboration.
- Contributed to frontend performance and workflow optimization by helping unblock development bottlenecks and improving delivery efficiency in an Agile/Scrum environment.

Education

BSc in Communication and Media Studies – Estácio, Brazil (2022 - 2026)
Fullstack Scholarship – Ada Tech + Santander, Brazil (2025)

Languages

English: Full professional proficiency
Portuguese: Native

Skills

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), React Native, Redux, Zustand, Tailwind CSS, Styled Components, HTML5, CSS3
Backend & APIs: Ruby on Rails, Node.js, Express.js, REST APIs, Scalable API Design, PostgreSQL, Supabase
Cloud & DevOps: Docker, CI/CD, Git, GitHub, Observability, Performance Optimization
Architecture & Practices: Frontend Architecture, State Management, Micro Frontends, Responsive Design, Agile/Scrum, Jira, AI-Powered Products, Cross-Functional Collaboration
Testing Tools: Cypress, Playwright, Jest, Postman
