

Ana Gomes

Software Engineer | Front-End Engineer | React Specialist

anaclimgo@gmail.com | +55 87 9 8831-0406 | [Linkedin](#) | [Github](#) | [Portfolio](#) | Pernambuco, Brazil

Summary

Frontend-Focused Software Engineer with experience building scalable SaaS platforms, AI-powered products, and modern web applications. Skilled in React, Next.js, TypeScript, Tailwind CSS, Ruby on Rails, and cloud-based development workflows, with experience optimizing application performance, improving developer experience, and delivering production-ready user interfaces. Proven impact reducing API requests by up to 95%, optimizing AI infrastructure costs by 70–85%, and refactoring complex React codebases for scalability and maintainability. Interested in remote opportunities focused on frontend engineering, product development, and modern SaaS platforms.

Experience

Software Engineer

Content Path | London, UK (remote)

09/2025 – Present

- Refactored large-scale React components (3k+ lines), improving maintainability, state isolation, and frontend scalability across complex AI workflows
- Designed local-first persistence and intelligent caching strategies, reducing unnecessary API requests by 90–95% and significantly improving UX responsiveness
- Developed dynamic real-time interfaces for AI-powered canvas workflows using React, TypeScript, Zustand, and Supabase
- Collaborated directly with founders to balance rapid product iteration with long-term frontend architecture decisions
- Improved AI infrastructure efficiency by implementing orchestration and optimization layers, reducing token consumption by 70–85%
- Structured scalable frontend/backend boundaries to support multi-tenant organizations, permissions, and real-time collaboration features
- Enhanced platform reliability and debugging workflows through monitoring integrations with Sentry and SonarQube
- Contributed to scalable PostgreSQL and Supabase architecture supporting high-performance product features and future growth

Skills: React, Next.js, TypeScript, Zustand, Tailwind CSS, Supabase, PostgreSQL, Node.js, Express.js, Docker, REST API

Front-End Engineer

Pipoca Ágil | São Paulo, Brazil (remote)

01/2025 – 10/2025

- Developed responsive web and mobile interfaces using React.js, React Native, Tailwind CSS, and Styled Components
- Integrated RESTful APIs with frontend applications, collaborating closely with backend developers to deliver scalable product features
- Introduced Docker-based development workflows to the team, eliminating “works on my machine” issues and improving onboarding consistency across environments
- Mentored junior developers through pair programming, technical guidance, and GitHub code reviews
- Improved frontend performance and delivery efficiency by helping streamline team workflows and unblocking development bottlenecks

- Collaborated within Agile/Scrum processes using Jira, participating in sprint planning, feature discussions, and iterative product delivery

Skills: React.js, React Native, TypeScript, Tailwind CSS, Styled Components, Docker, REST APIs, GitHub, Jira

Education

BSc in Communication and Media Studies – Estácio, Brazil (2022 - 2026)
Fullstack Scholarship – Ada Tech + Santander, Brazil (2025)

Languages

English: Full professional proficiency
Portuguese: Native

Skills

React | Typescript | Next.js | Redux | Javascript | TailwindCSS | Frontend Architecture | UI/UX | React Native | REST APIs
| Supabase | Docker | Git | AI-Powered Products | Scrum
